MAYOR AND COUNCIL WORKSESSION

NO. /8(i) DEPT.: / Community Planning and Development Services

CONTACT: Arthur D. Chambers, AICP, Director, CPDS

DATE: 7/26/04

SUBJECT FOR DISCUSSION:

Cultural Arts Building Issues

ORDER OF DISCUSSION:

- 1. Size
- 2. Street Level Plan
- 3. Contract for Design

GENERAL DIRECTION SOUGHT AND SPECIFIC QUESTIONS TO BE ANSWERED: Prior to awarding the design contract for the cultural arts building, there are a few issues that need to be addressed. The primary issue is the size of the building. Currently, the project budget includes funds to construct a three-story building. FRIT would be responsible for the construction costs of the retail space (approximately 9,500 square feet) After the building is complete, title to the retail space would be transferred to FRIT. The City would retain ownership of approximately 1,800 square feet at the street level and approximately 25,000 square feet on floors two and three.

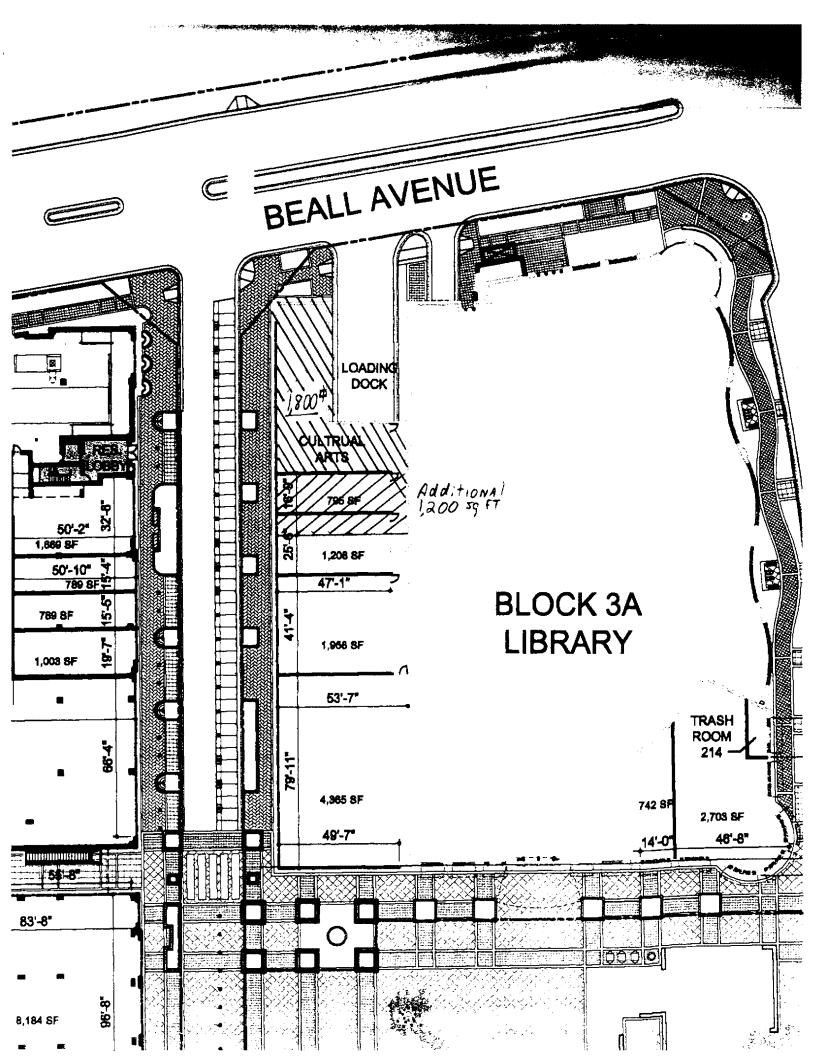

There has been considerable discussion about adding a fourth floor to the building and a block box theater. Cost estimates were provided to the Mayor and Council in December 2003. The estimate for the additional floor was approximately \$1.3m. The cost estimate to add a black box theater was an additional \$775,000. The current Town Square budget is showing approximately \$2.1m for the public portion of the building construction costs. In order to add a fourth floor, additional funds will need to be identified. At this time, a proposal and contract are being prepared in order to commence the design of a three-story building shell. If the Mayor and Council desire to have a four-story building, funds will need to be identified and the contract revised.

It should be noted that the interior design and construction are being discussed with Rockville Arts Place. The result of those discussions will be a Memorandum of Understanding between the City and Rockville Arts Place. It is anticipated that the MOU will be forwarded to the Mayor and Council in September or October. A representative from RAP would be involved in the design of the building.

The second item is the street level plans. A copy of a draft floor plan for the street level is attached. Approximately 1,800 square feet of space would be located at the north end of the building. Access would be from Commerce Street. The amended and restated GDA provides that the City can lease an additional 1,200 square feet with an option to purchase. Rockville Arts Place has been informed of those provisions and will include that in their analysis and design.

As indicated above, a proposal and contract with WDG Architecture for the design of the building is being prepared for the Mayor and Council meeting on August 2. Within the contract there will be

provisions for input from the Mayor and Council. After the design stage the building will then need to obtain a use permit, after which the final construction plans will be prepared. It is estimated that the total design time will take six to eight months.
LIST OF ATTACHMENTS: 1. Street Level Plan.

MAYOR AND COUNCIL WORKSESSION

NO. /8 (ii) DEPT.: City Manager's Office /

CONTACT: Jennifer Kimball, City Manager's Office

DATE: July 22, 2004

SUBJECT FOR DISCUSSION: Mayor & Council Goals Update and Quarterly Project Management Reporting

ORDER OF DISCUSSION:

- 1. Overview of the report format
- 2. Review individual project sheets
- 3. Update on status of last year's qoals

GENERAL DIRECTION SOUGHT AND SPECIFIC QUESTIONS TO BE ANSWERED:

The Mayor & Council asked staff to report quarterly on the status of projects related to their goals and objectives for the current term. On June 1, the Mayor & Council reviewed a draft project management report and provided feedback on the format and content.

This report incorporates the Mayor & Council's suggestions, and updates the status of each project. A new section is added, in response to a Mayor & Council request, that shows the project milestones to be completed by month (August, September and October). Based on an additional request from the Mayor & Council, a table summarizing the status of last year's goals and action items begins at ©60.

Staff from the relevant departments will be available to answer questions about specific projects. Staff asks the Mayor & Council to share any additional feedback on the format and content of the report, including the new section that presents project milestones by month. Staff also welcomes comments on specific projects.

LIST OF ATTACHMENTS:

- 1. Cover Memo (pages 1-3)
- 2. Project Management Report (©1-59)
- 3. Status of 2002-2003 Goals and Action Items (@60-61)
- 4. Memo from Neighborhood and Community Services regarding recidivism in property maintenance violations (©62-68)

MEMORANDUM

June 21, 2004

TO:

Catherine Tuck Parrish

Acting City Manager

FROM:

Jennifer Kimball Assistant to the City Manager

SUBJECT:

Project Management Report

As part of the goals and objectives of the current term, the Mayor and Council asked staff to track progress on selected City projects. On June 1, the Mayor and Council discussed a draft project management report developed by staff. The attached report incorporates the Mayor and Council's comments and suggestions, and updates the status of each project.

Report Format

The project management report begins at ©1. Similar to the draft report reviewed in June, it begins with a table of contents organized by goal. Based on a suggestion from the Mayor and Council, the projects that are not part of the Mayor and Council's current goals are listed under the most relevant goal as "Additional Related Projects."

The report includes a table for each project that lists milestones, original target dates, current target dates, and completion dates. Icons identify steps that involve the public (decision-making by the Mayor and Council (*). In response to the Mayor and Council's request, this report includes two new projects: Noise Studies and Inventory of Properties in Lincoln Park.

¹ For construction projects, the completion date listed indicates the date that the construction is completed.

The Mayor and Council also expressed interest in viewing the milestones by month to help understand how much work and what kinds of work would be completed during each month of FY 2005. Three tables, beginning at ©53, list the project milestones that will be completed in August, September and October. It also shows the lead department responsible for each milestone. If the Mayor and Council find the information useful, we will continue to include these tables in each project management report.

We will produce another project management update in October 2004 that provides updated information for each project and incorporates any additional feedback.

Comments Related to Specific Projects and Initiatives

Pedestrian Safety. The effort to assess pedestrian safety at state and county intersections is underway (see ©31). Based on the work to date, staff reports that the following intersections are substandard for pedestrian activity and require various improvements:

- MD 355/King Farm Blvd.
- MD 355/Redland Rd.
- MD 355/N. Washington St.
- MD 355/Gude Drive
- MD 355/Wootton Pkwy.
- Shady Grove Rd./Fallsgrove Blvd.

Staff met with the County Department of Public Works and Transportation to discuss potential improvements and will draft a letter to the State Highway Administration to obtain permission to improve these locations.

In addition to the activities described in the project management sheets for pedestrian safety, DPW staff is working with the Fallsgrove and King Farm Traffic Committees to address pedestrian enhancements in those communities.

Traffic Calming. DPW is focusing attention on traffic calming since it is one of the Mayor and Council's objectives. The department is re-thinking how traffic calming work is completed and developing performance measures to assess the results of the work. Staff is taking advantage of maps and multiple years of data to link performance measures to the Mayor and Council's goals and objectives for traffic calming.

For example, DPW records the top speeding locations in the City over multiple years to assess how traffic calming measures impact speeds in those key locations. DPW also tracks a series of performance measures for every planning area in the City, such as the percent of streets with sidewalks on 1 or 2 sides of the street. Staff is developing a presentation on this performance measurement effort to share with the Mayor and Council during a worksession this fall.

Property Maintenance/Code Enforcement. One of the Mayor and Council's expected outcomes is "to develop and implement a plan to reduce recidivism rates among property maintenance violators." A team in Neighborhood and Community Services has spent the past two months studying recidivism rates and developing strategies to address recidivism. A memo attached at ©62-68 outlines their work to date, and recommendations to further reduce recidivism in property maintenance violations.

Analysis of Neighborhood and Community Services. In an effort to build the capacity and value of NCS programs and services, the department is undertaking some targeted strategic thinking and planning through the remainder of the calendar year. The effort will include discussing and analyzing:

- The services NCS anticipates residents will need over time,
- The services currently provided and how they relate to the Mayor and Council's goals,
- The Department's structure and staffing,
- Best practices from other communities,
- Appropriate data to collect to assess the outcomes of service provided,
- Recommendations about programmatic and systematic changes that will lead to targeted outcomes, and
- Ways to maximize outreach.

NCS will update the Mayor and Council periodically on the progress and results of this effort.

Public Safety. Last month, the Police Department shared its goals and objectives for FY 2005 with the Mayor and Council. The document described the Department's values; crime related, service related and internal management objectives; and specific sub-objectives for the fiscal year. Objectives directly associated with the Mayor and Council goals include decreasing traffic issues during Town Center construction and ensuring appropriate performance measures are tracked. Other objectives include:

- Ensure that the department is prepared to install additional parking meters,
- Eliminate the need to roll fingerprints in ink and reduce errors,
- Streamline records management by putting different databases in one records management system,
- Obtain the technology to notify a large group of citizens of issues/concerns at once,
- Complete the purchase of equipment to implement the 800 MHZ radio and CAD system.

Update on the Status of Last Year's Goals

At the June 1st worksession, the Mayor and Council asked staff to provide an update on the status of last year's goals. The table attached at ©60-61 lists the goals and action items for 2002-03. The second column briefly describes the status of each item. Most of the items were completed. Others are on-going through the Mayor and Council's current goals and objectives (e.g., Town Center redevelopment).

Definitions

"Original Target Date" refers to the date that staff expected to complete the milestone/activity when the project or program began.

"Current Target Date" refers to the date that staff expects to complete the milestone/activity as of the date of this quarterly report. If no "Current Target Date" appears, the "Original Target Date" still applies.

"Completion Date" refers to the date that the milestone/activity was completed. For construction milestones, it is the date that the construction is completed.

Mayor & Council Goals

Goal #1: Create a Vibrant Town Center

TC

Expected Outcomes

- Approve the final design for the Town Square project
- Provide parking that will be distinctly "user friendly"
- Design and build a new cultural arts center
- Set the stage for redevelopment of the Stonestreet Avenue corridor (develop a vision and then develop and implement a plan to achieve that vision)
- Set the stage for redevelopment of the block north of Beall Avenue (develop a vision and then develop and implement a plan to achieve that vision)
- Develop and implement a comprehensive transportation plan for town center to:
 - Enhance safety and mobility for pedestrians, bicyclists and motorists
 - Protect the character and integrity of surrounding neighborhoods
 - > Foster increased use of mass transit
 - Provide a local loop shuttle service to connect the Rockville Metro/MARC station, town center and the surrounding neighborhoods
- Explore new options for targeted senior housing in town center
- Secure additional investment by the other levels of government

Goal #2: Ensure New Development Citywide Enhances Rockville's Quality of Life

Expected Outcomes

- Adopt an adequate public facilities ordinance
- Review and revise the City's zoning ordinances
- Review and revise the City's reforestation requirements
- Review and revise the Rockville Pike Corridor Plan
- Set the stage for redevelopment of the area around the Twinbrook Metro station (develop a vision and then develop and implement a plan to achieve that vision)

Goal #3: Improve Pedestrian & Traffic Safety

Expected Outcomes

- Improve pedestrian safety along state roads in Rockville (in collaboration with the county and state governments
- Continue to implement traffic-calming solutions to address speeding and traffic volumes on neighborhood streets
- Address neighborhood access issues at the most problematic intersections (e.g., intersection of Edmonston Dr. and Lewis Ave.)
- Enhance traffic enforcement by Rockville police

Goal #4: Strengthen Rockville's Neighborhoods & Sense of Community

Expected Outcomes

- Develop and implement a plan to:
 - Reduce the number of property maintenance violations
 - > Reduce the time required to resolve property maintenance violations
 - > Reduce recidivism rates among property maintenance violators
- Enhance important community-oriented police programs (such as park patrols, outreach programs to local schools, etc.)
- Explore new initiatives to expand the creation of affordable housing (with one particular focus on housing for seniors)
- Identify and implement new initiatives designed to bring together diverse cultures and age groups in our community

Goal #5: Enhance the City Government's Performance

Expected Outcomes

- Identify and achieve stretch targets for cost and service quality improvements
- Implement the disciplines of project management and milestone tracking for major initiatives and projects
- Identify and implement strategic performance measures in order to assess:
 - Cost performance
 - > Customer satisfaction
 - > Progress on major initiatives and projects
- Redirect the city government's resources, as necessary, to achieve strategic goals and objectives

City of Rockville

MEMORANDUM

July 19, 2004

TO: Catherine Tuck-Parrish, Acting City Manager

FROM: Victor Sajauskas, Supervisor of Community Enhancement/Code Enforcement

VIA: Guerdon Stuckey, Director of Neighborhood and Community Services

SUBJECT: Mayor and City Council Goal - Strengthen Rockville's Neighborhoods and Sense

of Community

This memorandum is being written as a proposal for assisting in the implementation of the Mayor and Council's Goal of Strengthen Rockville's Neighborhoods and Sense of Community.

Part 1: Strategy to Address the Mayor and Council's Objective to protect property values and ensure a consistent level of property maintenance citywide.

Reducing Recidivism:

By utilizing the City's Permit Plan software, we can identify the properties that have been sited for code violations since 1993. After analyzing this data, we believe that the time is appropriate to take stronger measures to deal with the issue of the repeat violator. In order to assist us in taking a stronger enforcement position, we feel that it would be appropriate to issue a Municipal Citation without any warning notice for any property that has been sited during the current year for nuisance type violations, such as, high grass, junk cars, parking on grass, and trash.

Certain code issues such as driveway repairs, painting, exterior siding repair or other major type of violations should be investigated further because economic hardship can cause these types of conditions to re-occur. Resources can often be identified to assist in the abatement of these code issues.

Recommendations:

- Increase public awareness regarding code enforcement and property maintenance through Spanish and Asian translated materials, technology changes (GIS), and attendance at HOA and civic group meetings.
- Issue a Municipal Citation without a warning notice if the previous violation (weeds, trash, junk vehicles) occurred in the same fiscal year.
- Eliminate extensions where a property has a history of violations.
- Increase the initial Municipal Citation fines from \$100 to \$200 per violation.
- Continue to identify and maintain a "Trouble Property List."
- Implement the Division's Strategic Approach to Code Enforcement, See Part II.

Reducing the Number of Property Maintenance Violations

Using the Performance Measure data from the ICMA reports for FY 2001 thru FY 2003, we are pleased to report that there has been a decline in the total number of code violations.

ICMA places property maintenance into three categories:

- Housing violations health and safety issues, trash issues, and general property maintenance issues (general repairs needed on the property).
- Nuisance violations trees and branches, no license/permit, rats, vehicle control (parking on grass and unlicensed vehicles), and weeds.
- Zoning violations overcrowding and home occupation violations.

Fiscal Year 2001 – 616 housing violation cases initiated

1096 nuisance violation cases initiated

97 zoning cases initiated

Total - 1809

Fiscal Year 2002 - 627 housing violation cases reported

949 nuisance violation cases reported

57 zoning cases reported

Total - 1633

Page 3 July 19, 2004

Fiscal Year 2003 - 641 housing violation cases reported

471 nuisance violation cases reported

86 zoning cases reported

Total - 1198

Recommendations:

• Educate and inform the public of code issues via Rockville Reports, the City's Cable Channel, other newspapers especially those printed in Spanish or Asian languages and by attending Neighborhood Association meetings.

- Continue the Department's Outreach Strategy of better understanding the needs and concerns of our communities.
- Continue Department's Outreach Strategy for different cultural groups.
- Implement Strategic Neighborhood Exterior Inspection Policy (this will be defined in Part 11 of this memorandum).

Time Required to Resolve Property Maintenance Violations:

Some residents argue that the City has been too lenient on code enforcement in an effort to provide a friendlier more community-oriented approach. Other residents believe that the City has been too stringent. The level of leniency desired is critical in determining the level of enforcement.

Different types of violations require a certain amount of time to abate. Currently we are allowing 10 days for trash, weeds, vehicle control, pruning bushes, and 30 days for repairs and painting. Extensions are granted depending on the reasons stated by the occupant/owner. In addition, cases that are referred to Court increase the time by a minimum of 60 days.

Some factors that may influence the time restraints on code enforcement are; age of occupant, financial cost, different cultural habits, age of the house, and the amount of repair work that needs to be performed.

Recommendations:

- Maintain the current time allowed for abatement, 10 days for trash/ weeds and 30 days for repairs.
- Work more closely with the non-profit sector, e.g., Community Ministries of Rockville and Rebuilding Together (Christmas in April).

- Increase the City's contribution to Community Development Block Grant Program. (Tax rebates could be provided for major repairs similar to the rehab of a historic property.
- Provide funds to hire a contractor for Court Ordered repairs (painting, siding repairs)
- Notify neighborhoods and communities that a property has major code violations and that Code Enforcement Division is active in enforcement. This can be done by posting signs at the property and providing the information on the City Web page.
- Work with Neighborhood Associations to identify community volunteers to assist neighbors in maintaining their properties.

Part 11 - Strategic Neighborhood Exterior Inspection Program

Effective June 1, 2004, The Division of Community Enhancement and Code Enforcement initiated the Neighborhood Exterior Inspections Program.

Three inspectors assigned to the Community Enhancement Program will inspect all of the residential properties in the City within an 18-month period. The City was divided into three Phases and each Phase was then divided into areas. There are a total of 44 areas. Each area has a scheduled start up and completion date for the exterior inspections. These dates will be rolled over when the last area is inspected. See attached map designating the areas.

For major code violations such as abandoned automobiles, junk vehicles, parking on grass, trash, major painting, house/shed/fence repairs, and driveway repairs, a written notice will be sent and/or left at the property for correction with follow up inspections. For minor issues such as house numbers, pruning, small amount trash, minor downspout repair, minor painting (small section of a cornice), or minor driveway repairs, a reminder will be left at the property for the occupants to correct. No follow up inspection will be conducted on these.

An inspection report sheet will be used to list the date the inspection occurred, property inspected, condition of property (poor, fair, good) and any actions taken by staff. We will be developing a database system to manage this process and to analyze trends.

In an ongoing outreach effort, staff will attend neighborhood and community meetings (including those with different cultural groups) to inform residents of the upcoming inspections and to distribute publications on code issues.

All complaints will still be investigated within a 24-hour period. Also, all other referrals and other inspector-generated cases will be continued.

Page 5 July 19, 2004

Initially, we expect an increase in the number of property maintenance violations reported. After the initial round of inspections, however, there should be a decline in reported cases as well as complaints received.

Phase I:

This phase consists of Twinbrook, East Rockville, Lincoln Park, Burgundy Knolls, Burgundy Estates, and all other areas East of Route 355. See attached City map.

These neighborhoods were selected for Phase I because of the aging housing stock and because this area has the most reported and observed violations as compared with other sections in the City.

This area should be completed in a 10-month period. The area is designated in "yellow" on the attached map.

Phase II:

This Phase consist of areas west of Route 270, King Farm and surrounding area.

This area was selected for Phase II because the area has been without an assigned inspector for several months. Since the areas in Phase II are in relatively good condition, this should be completed in 3 months. Phase II is designated "pink" on the attached map.

Phase III:

This area includes everything south of Gude Drive, between Route 355 and Route 270. This area is estimated to be completed in a 5-month period. It is designated in "orange" on the attached map.

Implementation of Inspection Program

Inspectors started this process on June 1, 2004 with Phase I. The time frame for completion of inspections for all phases will be June 1, 2004 to November 30, 2005 a total of 18 months.

This program will assist in the Mayor and Council's Goal for Strengthening Rockville's Neighborhoods and Sense of Community. Through its implementation, as proposed, we believe that this division can ensure a better quality of life, a safer environment, more cordial relations with neighborhoods, and improved conditions of an aging housing stock. Quarterly analysis will be done to determine how the program is progressing. The initial review will take place in late August 2004.
